

# Right Click Tools Features, Tools & Insights Breakdown

		Community Edition	Enterprise Edition
<b>Security &amp; Compliance Insights</b>			
SOFTWARE UPDATE DEPLOYMENT STATUS DASHBOARD	Run a highly-targeted scan of software update deployment compliance and take common device actions on any portion of the results.		
LAPS DASHBOARD	Surface compliance data about the Local Administrator Password Solution (LAPS). Return results in a simple, LAPS present/Not Present by device chart.		
LAPS PASSWORD VIEWER	View the current LAPS password and the expiration date from within the console. Retrieve from single or multi-selected devices.		
LAPS PASSWORD EXPIRATION	Expire a LAPS password on multiple devices. Recovery quickly from exposed LAPS passwords.		
BITLOCKER COMPLIANCE DASHBOARD	Discover the location of your BitLocker recovery keys and ensure your devices are compliant with BitLocker policies.		
BITLOCKER STATUS TOOL	Show status information about BitLocker on single or multi-selected devices and take several management actions.		
AD/MBAM BITLOCKER KEY TOOL	Pull the current BitLocker keys from either Active Directory or MBAM, and view immediately.		
REMOTE WINDOWS SECURITY	Display the status of common Windows security tools and take action to improve your security footprint.		
REMOTE SOFTWARE CENTER	Grants similar functionality as the local Software Center application with the ability to be run remotely from the administrator machine and at scale on numerous devices or device collections. View and install deployed applications, programs, software updates, and run/view task sequences.		
TREND ANALYSIS	See compliance levels over time, pulled into one place and easily sharable with management. See BitLocker, LAPS, AD Cleanup and Software Updates compliance levels.		
<b>Content Distribution</b>			
CONTENT INFORMATION DASHBOARD	Quickly view content tied to a specific task sequence, take action on that content, and manage the successful distribution of your task sequence content to where it needs to be.		
CONTENT STATUS TOOL	Shows general Distribution Point (DP) information and all content currently distributed to the selected DP. Right click to check the status of content, gather troubleshooting information, jump to the file source, redistribute, remove or validate, and more.		
REDISTRIBUTE ALL FAILED CONTENT TRANSFERS	This productivity tool makes resolving content transfer failures a single step. Running the tool will re-try any content transfer that had previously failed.		
CONTENT DISTRIBUTION MONITOR DASHBOARD	Manage and remediate content distribution failures with an overview of distribution job status for your entire environment.		
<b>Hardware &amp; Software Insights</b>			
CONTENT INFORMATION DASHBOARD	Visualize the hardware of the endpoints in your environment, including chassis type, manufacturer, and model. Plus, filter accordingly.		

		Community Edition	Enterprise Edition
<b>Environmental Health</b>			
ACTIVE DIRECTORY CLEANUP DASHBOARD	Scan Configuration Manager and Active Directory for devices, showing results about where those devices are: in just ConfigMgr, just AD, or (properly) in both. Device actions can be taken on results.		
TREND ANALYSIS	See compliance levels over time, pulled into one place and easily sharable with management. See BitLocker, LAPS, AD Cleanup and Software Updates compliance levels.		
QUICK QUERY	Improve the WQL query experience with larger and more complex queries, returning results quicker and allowing changes to the Query statement on the fly.		
USER TOOLS	Reset password, unlock account, view group memberships, and more.		
STATUS MESSAGE TOOL	View Status Messages in 24 different console locations.		
<b>Device Management</b>			
CLIENT ACTIONS	Easily accessible Client Actions, that can be run on single or multi-selected devices, plus evaluation and inventory cycle actions. Update Machine Policy, Hardware Inventory, start Software Update Scans, and more across multiple devices simultaneously.		
CLIENT TOOLS	Troubleshoot and manage the ConfigMgr client at scale. Manage client cache size, clear the cache, open logs, and more.		
CONSOLE TOOLS	Productivity actions for common administrative tasks, including 19 Administrative functions on single or multi-select Device Collections. Troubleshoot and manage Windows settings at scale. Show installed software, list services, view running processes, and more.		
DEVICE COLLECTION TOOLS	All of your favorite device management tools, available to run at scale.		
SYSTEM INFORMATION TOOL	Show many computers at the same time to get an overall idea on what's going on in your environment. Drill into Hardware, Drivers and More.		
CLIENT INFORMATION TOOL	Shows information pulled from the CM Client directly. Drill into cache on each machine, confirm items intended for pre-cache are on the client, clean out old versions and more.		
SEND NOTIFICATION TOOL	Send a message/notification to users of one or more devices.		
<b>Purpose-Built for Enterprises</b>			
SERVICENOW EXTENSIBILITY	Take action on users and devices to open them in ServiceNow.		
CONFIGMGR FAST CHANNEL SUPPORT	Use Right Click Tools on the ConfigMgr Fast Channel to run the tools without admin rights, remove the need for firewall ports on the devices and run actions over a Cloud Management Gateway (CMG).		
ROLE-BASED ADMINISTRATION	Use roles to assign permissions to users.		
CENTRALIZED CONTROL & MANAGEMENT	Centralize your Recast license management and Right Click Tools settings.		
CLOUD MANAGEMENT GATEWAY [CMG] SUPPORT	Run Right Click Tools actions over a CMG		

## Purpose-Built for Enterprises

Community  
Edition

Enterprise  
Edition

### UNTRUSTED DOMAIN SUPPORT

Interact with Active Directory objects in untrusted domains and run all of your favorite device actions against devices in those domains.

### ADVANCED LOGGING

Find out who's running Right Click Tools in your environment and what the results of those actions are.

### REST API

Build your own automation using our REST API. Includes support for untrusted domains, workgroup devices, or devices connected over CMG.

### INTUNE

Run Right Click Tools over Intune-connected clients in a co-managed environment.

### WORKFLOW AUTOMATION

In-console workflow creation suite with an accompanying execution and scheduling platform. Perform over 250 actions across dozens of categories.

### SUPPORT

Unlimited remote support from our dedicated Customer Success team.

## Add-Ons

### Shift Left

Enable your help desk team to run actions against AD and ConfigMgr from within the ServiceNow incident form, significantly increasing first call resolution.

### Kiosk Management

Provision and configure devices to support common single-purpose, kiosk-style requirements such as computer labs and digital signage. Configure Windows Unified Write Filter feature to create a known-good state. This state is then locked down and any changes made are reverted back upon a restart.

### Endpoint Insights

Access critical endpoint data not available natively in ConfigMgr or other ITSMs, including insights on computers, monitors, docking stations, warranty status and more.
