**RECAST** SOFTWARE

Why invest in 🔒 PRIVILEGE MANAGER ?

- **Increase security by limiting admin privileges across all devices**

- **Reduce help desk tickets by giving users permission to install pre-approved software**

- **Deploy devices faster by pushing predefined security profiles to multiple devices at once**

- **Get instant reports to learn when and why admin credentials are used**

- **Give your end users the access they need when they need it**
Give your end-users self-service without compromising security.

MANAGE LOCAL USER PERMISSIONS

Remove permanent admin privileges and replace them with temporary ones, enhancing the security of your environment and saving time for both users and help desk technicians.

TEMPORARY USER RIGHTS

Empower end-users with the access they need when they need it. Automatically provide limited administrative privileges without the user needing admin credentials.

FULL VIEW REPORTING

Track the use of admin credentials with detailed reporting capabilities. Improve visibility of local users or groups with access on various devices or workplace groups.

> "With Privilege Manager, you can manage access rights in a centralized manner, which saves time, is easy to manage on a global level, and something service desks really benefit from.
